

**REMARKS**

The foregoing amendments are effected to more particularly point out and distinctly define the subject matter of this invention.

The amendments to the specification are for editorial purposes. No new matter has been added by this amendment.

Favorable action on the merits is solicited.

Respectfully submitted,

Yuji ISHIHARA et al.

## AMENDMENTS TO THE ABSTRACT

*Please replace the Abstract on page 24 with the attached revised Abstract (clean version). A marked-up version of the revised Abstract, showing the changes made therein, is set forth below.*

Agents for improving potency of the urinary bladder which ~~comprises~~ comprise an amine compound of non-carbamate-type having an ~~acetylcholine esterase~~ acetylcholinesterase-inhibiting action. Particularly, crystals of a tricyclic, condensed, heterocyclic derivative are provided, which possess an excellent action to inhibit acetylcholine esterase and an action to improve the excretory potency of the urinary bladder. As an example, crystals of of 8-[3-[1-[(3-fluorophenyl)-methyl]-4-piperidinyl]-1-oxopropyl]-1,2,5,6-tetrahydro- 4H-pyrrolo[3,2,1-ij]quinolin-4-one or a salt thereof and pharmaceutical compositions containing them are disclosed.
